Website shows it is \$49.99 a year, but is currently offering a 40% savings, so it's only \$29.99 a year.

Not sure how long this special will last.

****Very important—Write down all your log in information and passwords for these sites. You will need them to log into them every time.**

****TIP—I found it easier for me to make a folder on my “Desktop” on the computer to save all my e-packets to. Just right click your mouse on the “Desktop” and a window will pop up. Scroll and click on the “New” tab and the next window will give you the choice of “New Folder”. Click on that. It will put it on your desktop. The “New Folder” name will be highlighted blue, This is where you name your file. Name it whatever you want. I just named mine “Epackets”. So when you save your epackets, all you have to do is click on “Desktop” then find your file that says “Epackets” and click save. Easy Peasy..**
